DIO 8
DIO 7
DIO 6
DIO 5
DIO 4
DIO 3
DIO 2
DIO 1

Color	Digit	Multiplier	Tolerance (%)
Black	0	10^0 (1)	
Brown	1	10^1	1
Red	2	10^2	2
Orange	3	10^3	
Yellow	4	10^4	
Green	5	10^5	0.5
Blue	6	10^6	0.25
Violet	7	10^7	0.1
Grey	8	10^8	
White	9	10^9	
Gold		10^{-1}	5
Silver		10^{-2}	10
(none)			20

Main Module

```
import slab
```

Management Commands

```
help([topic])
setVerbose(level)
connect([portName])
disconnect()
softReset()
printBoardInfo()
wait(time)
pause(message)
setPlotReturnData(value)
```

File Commands

```
save(filename,data)
load(filename)
setFilePrefix([prefix])
setCalPrefix([prefix])
```

Basic DC Commands

```
setVoltage(channel,value)
readVoltage(ch1 [,ch2])
rCurrent(rvalue,ch1 [,ch2])
dcPrint()
dcLive(n [,wt,'single'])
```

Ratiometric Commands

```
writeDAC(channel,value)
readADC(channel)
```

Global DC Commands

```
setDCreadings(number)
zero()
```

Generic Plot Commands

```
plot1 l(x,y [,title,xt,yt,'logx','logy'])
plot1 n(x,ylist [,title,xt,yt,labels
,location,'logx','logy'])
plotnn(xlist,ylist [,title,xt,yt,labels
,location,'logx','logy'])
```

Sweep DC Commands

```
dcSweep(ndac,v1,v2 [,vi,wt])
dcSweepPlot(ndac,v1,v2 [,vi,na,wt,'RD'])
realtimePlot([nadc,wt,n,'RD'])
```

Transient Commads

```
setSampleTime(time)
setTransientStorage(samples [,na])
Alias tranStore(samples [,na])
transientAsync()
transientTriggered(level [,mode
,timeout])
stepResponse(v1,v2 [,tinit])
```

Transient Plot Commands

```
tranAsyncPlot([°RD])  
tranTriggeredPlot(level [,mode  
                        ,timeout,°RD])  
stepPlot(v1,v2 [,tinit,°RD])
```

Wave Commands

```
waveSquare(v1,v2,np *)  
waveTriangle(v1,v2,np *)  
waveSawtooth(v1,v2,np *)  
waveSine(v1,v2,np *)  
waveCosine(v1,v2 *)  
wavePulse(v1,v2,np,n1 *)  
waveNoise(v1,vstd,n *)  
waveRandom(v1,v2,n *)  
      * : [,°returnList,°second]  
loadWavetable(list [,°second])  
setWaveFrequency(freq)  
waveResponse([npre,tinit,°dual])  
wavePlot([npre,tinit,°dual,°RD])  
singleWaveResponse([ch,npre,tinit])  
singleWavePlot([channel,npre,tinit,°RD])  
wavePlay([n,tinit,°dual])
```

Vector Utility Commands

```
highPeak(vector)  
lowPeak(vector)  
peak2peak(vector)  
halfRange(vector)  
mean(vector)  
rms(vector)  
std(vector)
```

Digital I/O Commands

```
dioMode(line [,mode])  
dioWrite(line,°value)  
dioRead(line)
```

Calibration Commands

```
setVdd(value [,persistent])  
setVref(value [,persistent])  
manualCalibrateDAC1() Alias cal1()  
adcCalibrate() Alias cal2()  
dacCalibrate() Alias cal3()  
checkCalibration() Alias cal4()
```

Internal Variables

vdd, vref, sampleTime, linux

DC Module

```
import slab_dc as dc
```

Two terminal I-V plots

```
curveVI(v1,v2 [,vi,r,wt,°RD])  
curveVIref(v1,v2 [,vi,r,wt,°RD])  
curveVIbridge(v1m,v2m, [,vi,r,wt,°RD])
```

Voltage I/O plots

```
curveVV(v1,v2 [,vi,wt,°adc2,°RD])  
curveVVref(v1,v2 [,vi,wt,°adc3,°RD])  
curveVVbridge(vp,vn [,vi,vmin,wt,°RD])  
hystVVcurve(v1,v2 [,vi,wt,°RD])
```

Current Output Transfer plots

```
transferCurveVI(v1,v2 [,vi,wt,ro,°RD])  
transferCurveII(v1,v2 [,vi,r1,r2,wt,°RD])
```

Device curves

```
vDeviceCurve(vi1,vi2,vii,vo1,vo2  
              [,voi,ro,wt])  
iDeviceCurve(vi1,vi2,vii,vo1,vo2  
              [,voi,ri,ro,wt])
```

AC Module

```
import slab_ac as ac
```

Frequency Response Commands

```
sineGain(v1,v2,freq [,channel,  
                    npre,maxfs])  
sineGainAll(v1,v2,freq [,npre,maxfs])  
freqResponse(v1,v2,fvector [,channel  
                        ,npre,maxfs])  
freqResponseAll(v1,v2,fvector  
                [,npre,maxfs])
```

Frequency Plot Commands

```
plotBode(fvector,gvector  
         [,labels,°linear])  
bodeResponse(v1,v2,fmin,fmax [,ppd,  
                        channel,npre,maxfs,°RD])
```

Utility Functions

```
logRange(start [,end,ndec,ppd])  
f2w(value)  
w2f(value)  
magPhase(value)  
mag(value)  
phase(value)
```

Meas Module

import slab_meas as meas

Time Analysis Commands

period(vector [,time,ts,mode])
tcross(vector,value [,mode,time,ts])

Global Analysis Commands

analyze(data)

FFT Module

import slab_fft as fft

ftransform(signal [,time,ts])
distortion(v1,v2,freq [,°show])

EZ Module

from slab_ez import *

Connects automatically at import time

Management Commands

help([topic])
connect()

DC Commands

readVoltage(ch1 [,ch2])
setVoltage(channel,value)
dcPrint()
zero()
liveVoltage()
sweepPlot([v1,v2,vi])
ioCurve()
bridgeCurve()
trendPlot([n])

Transient Commands

sineResponse(vmin,vmax,f)
triangleResponse(vmin,vmax,f)
squareResponse(v1,v2,f)
sineBridgeResponse(vmax,f)

Legend:

[] : Optional parameters
° : Digital value (True or False)
°RD : °returnData
